

This webinar will cover:

- screening mammography recommendations
- the benefits and limitations of 3D mammography
- effects of breast density on breast cancer detection

Featured speaker:

Dr. Trisha Prescott is a diagnostic radiologist who specializes in breast imaging. She received her medical degree from the University of Minnesota in 2007. She then went on to complete a diagnostic radiology residency at the University of Minnesota. During residency she was elected to serve as Chief Resident. In 2012 she became board certified in diagnostic radiology. Following residency she went on to complete a breast imaging fellowship at the University of Minnesota. Dr. Prescott has been practicing as a breast imaging specialist with St. Paul Radiology since 2013. During this time she has taken on leadership roles at HealthPartners and HealthEast Breast Centers in the Twin Cities area.
