

This webinar will cover:

- Updates on breast cancer vaccines.
- How your immune system works and its response to breast cancer.
- How other immune-based approaches are being used to treat and prevent breast cancer.

Dr. Keith L. Knutson, PhD serves as a Senior Associate Consultant to the Mayo Clinic and an Assistant Professor of the Department of Immunology at the Mayo Clinic College of Medicine. Dr. Knutson serves as Director of the Mayo Clinic Cancer Center Immunology and Immunotherapy Program; Co-director of Mayo Clinic Immune Monitoring Core; and Director of Ovarian Cancer Immunotherapy Program at Mayo Clinic. Dr. Knutson's work focuses on the immunology and immunotherapy of breast and ovarian cancers, both the basic immunobiology and clinical translation, including clinical trials.
